

I pay for this service because I travel alot, I recieve info about road and travel conditions when we are to far away from local stations to recieve them clearly or even know where to tune on the dial to get that info. On XM Instant Traffic & Weather I get this & Know other place does this happen.

I urge you to reject this petition 04-160 of the NBA as a petition with out all the people who use this & saved how many lifes.

I think more research is needed and they will surly see why this is such a good thing.
